## **Research Proposal Series:**

# **Literature Review - Searching**

**Kitty Delaney and Jaya Ralph**

**Faculty Librarians - Humanities, Business & Law  
2024**

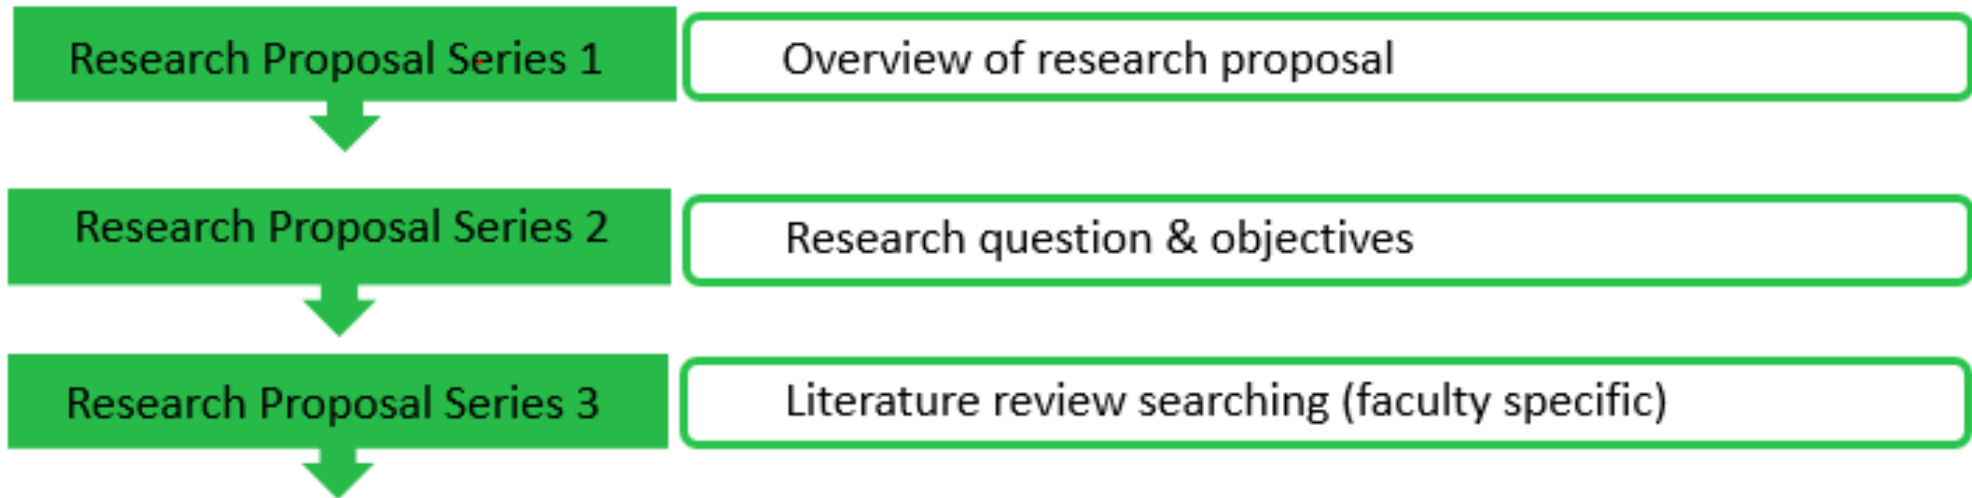

TL ROBERTSON LIBRARY

We would like to acknowledge the traditional owners of the land on which Curtin Perth is located, the Whadjuk people of the Nyungar Nation.

We pay our respects to their Elders past and present, and we would like to recognise that this Country has been a place of teaching, research and learning for tens of thousands of years.

# The GRASP program.....

# Before we start.....

# The things we are looking at.....

- Planning your literature review
- Identifying sources of information
- Translating the research question into a search strategy
- Maximising strategies for effective searching
- Staying up-to-date with your research topic
- Managing your research results
- Help and other useful stuff

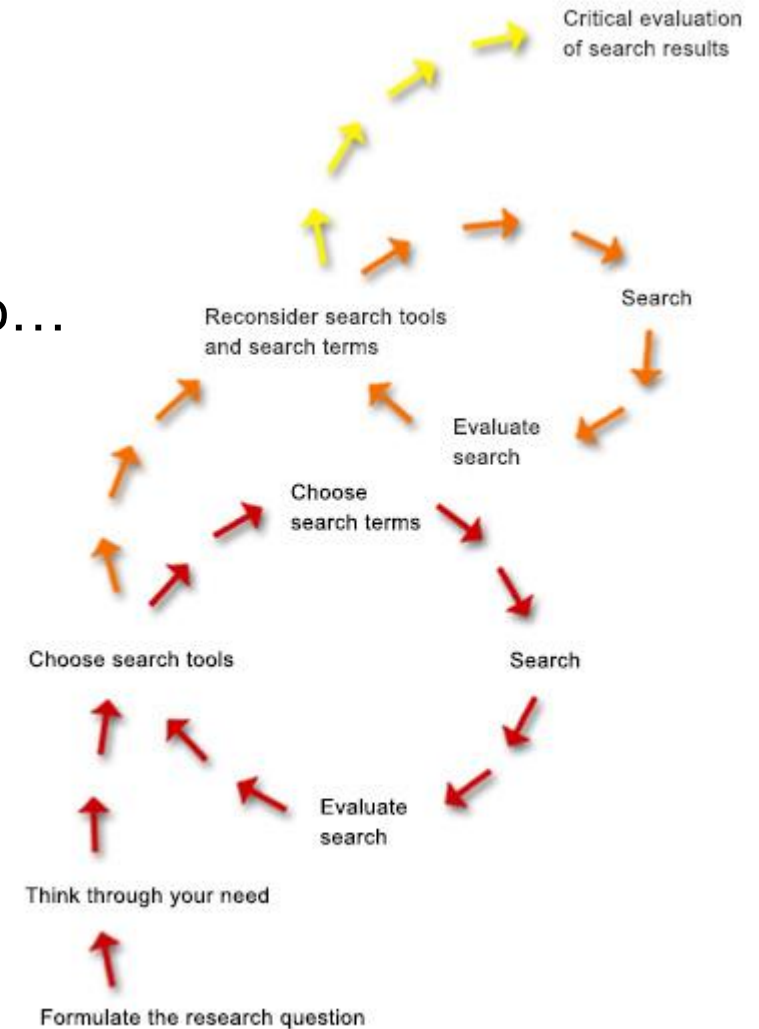

# Planning.....

- **Planning your literature review**
- Identifying sources of information
- Translating the research question into a search strategy
- Maximising strategies for effective searching
- Staying up-to-date with your research topic
- Managing your research results

# Planning your literature review.....

Plan your search with a clear strategy in mind:

- It begins with a robust research question
- Decide on what kind of literature review you will do...
  - Scoping review
  - Narrative or traditional
  - Systematic style literature review
- Decide on the type of information you need and where you can get this information
- Understand the search process and get the most out of your resources
- How will you manage your research results?

# Which database?

[databases.library.curtin.edu.au](https://databases.library.curtin.edu.au)

## Subject specific databases

Use the dropdown menu below for database recommendations or browse alphabetically. Key databases listed for subject areas will focus on databases which contain academic content, like journal articles.

Education

All databases

# Wait what!....

The Google logo, consisting of the word "Google" in its characteristic multi-colored font (blue, red, yellow, blue, green, red).The Google Scholar logo, with "Google" in the multi-colored font and "Scholar" in a grey sans-serif font.

## Search tips:

- Exclude a word: -word
- location:country
- daterange:date
- site:edu.au OR site:gov.au
- Google's Advanced Search page: [https://www.google.com.au/advanced\\_search](https://www.google.com.au/advanced_search)

# Grey Literature....

- Grey literature refers to both published and unpublished research material that is not available commercially
- Most grey literature is free. However, some sources such as market research firms charge for access to their material.
- Use Google to look for associations, organisations, government departments etc.
- Consider restricting your Google search to the .org and/or .gov domains on the Internet (site:gov.au )
- See our [Grey Literature guide](#) for more information

# Literature Reviews or Review Articles

- [ProQuest](#) – choose Review as the ‘Document Type’
- [Scopus](#) – choose Review as the ‘Document Type’
- [Annual Reviews](#) – provides critical reviews written by experts. Reviews will provide an overview of a particular subject often reviewing past research and focusing on current knowledge and avenues for future research.
- Using literature review keywords in database searches.

# Sage Research Methods Online

[Sage Research Methods online](#) –This tool is designed to help create research projects and understand the methods behind them. It provides step by step guides to quantitative and qualitative data analysis as well as useful case studies of methods applications, and definitions of research methods.

## Project Planner:

Provides useful steps to plan your research project and includes a section on reviewing the literature: <https://methods.sagepub.com/project-planner/reviewing-the-literature>

## Help videos:

### Abstract

While employees' mental health is the focus of considerable attention from researchers, the public, and policymakers, leaders' mental health has almost escaped attention. We start by considering several reasons for this, followed by discussions of the effects of leaders' mental health on their own leadership behaviors, the emotional toll of high-quality leadership, and interventions to enhance leaders' mental health. We offer 8 possible directions for future research on leaders' mental health. Finally, we discuss methodological obstacles encountered when investigating leaders' mental health, and policy dilemmas raised by leaders' mental health. © 2016 American Psychological Association.

# Strategies for when it gets tricky...

## Nesting

A technique that allows you to organize complex search statements using more than one kind of search operator.

When nesting, you are combining Boolean Operators (AND, OR, NOT) with symbols such as parenthesis, quotation marks, and truncations.

### Example:

(leader\* OR manager\* OR executive\* OR CEO OR C-suite) W/3 ("mental health" OR well-being OR stress OR burnout)

Video [link](#)

Image: Nina Garman - Pixabay

# Strategies for when it gets tricky...

## Proximity Searches

Proximity searching is a way to search for two or more words that occur within a certain number of words from each other. The proximity operators are composed of a letter (N or W) and a number (to specify the number of words). The number cannot exceed 255.

The proximity operator is placed between the words that are to be searched, as follows:

- Near Operator (N): **N5** finds the words if they are a maximum of five words apart from one another, regardless of the order in which they appear. For example, type **tax N5 reform** to find results that have a maximum of five words between the beginning and ending terms, that would match **tax reform** as well as **tax that has been submitted for reform**.
- Within Operator (W): **W8** finds the words if they are within eight words of one another, in the order in which you entered them. For example, type **tax W8 reform** to find **tax reform** but would not match **reform of income tax**.

In addition, multiple terms can be used on either side of the operator. See the following examples:

- (tax OR tariff) N5 reform
- oil W3 (disaster OR clean-up OR contamination)
- (baseball OR football OR basketball) N5 (teams OR players)

(Business Source Ultimate)

(Scopus)

## Proximity operators - W/n, PRE/n —

You can choose between two **Proximity** operators to find words within a certain distance from each other: **Pre/n** specifies a word order whereas **W/n** does not.

Proximity operator	Example
W/n	Indicates distance between words, but not the order — e.g., <i>journal W/2 publishing</i> , where <i>journal</i> can be found within a distance of two words from <i>publishing</i>
Pre/n	Terms must appear in a specific order between words — e.g., <i>behavioral PRE/3 disturbances</i> , where <i>behavioral</i> precedes <i>disturbances</i> within three words

# Search Strategies.....

[Pearl growing](#) or Snowballing or Citation mining

Pearl growing' (also known as 'Citation mining' or 'Snowballing') is an effective approach to systematic literature searching which helps to ensure that **all** relevant literature has been identified.

All three names hint at the iterative process involved – a grain of sand in an oyster grows slowly, layer by layer, into a pearl – one citation is mined, by digging deeper into the reference list and then digging even deeper into the references cited by those references – or a snowball is grown into a larger snowball by adding more layers of snow

Managers are Less Burned-Out at the Top: the Roles of Sense of Power and Self-Efficacy at Different Hierarchy Levels

Journal of Business and Psychology 2021

PDF

While managers generally seem to enjoy better mental health than regular employees, there are also plenty of reports about them suffering from burnout. The present study explores this relationship between hierarchy level and burnout in more detail. In doing so, we not only investigate what impact managerial rank may have on burnout, but we also contrast two different theoretically meaningful mediators for the relationship: sense of power (feeling in control over people) and work-related self-efficacy (feeling in control overtasks). The results of two surveys—the first with 580 managers (single-source) and the second with 154 managers matched with ratings from close others (multi-source)—show a negative relationship between managers' hierarchy level and burnout that is explained by both mediators independently. Additional analyses reveal that high sense of power and high self-efficacy are both necessary conditions for low levels of burnout. Such fine-grained analyses allow us to understand why managers at the top are less threatened by burnout, in contrast to what some media reports suggest.

Saved on	Alert name	Document	Frequency	Date last run	Actions	Status
1. 24 Aug 2020	2-s2.0-79956267727	<a href="#">The psychosocial impacts of fly-in fly-out and drive-in drive-out mining on mining employees: A qualitative study (2011) Australian Journal of Rural Health, 19 (3), pp. 135-141. Cited 70 times. Torkington, A.M.Larkins, S.Gupta, T.S.</a>	Every week	22 Aug 2022 <a href="#">Check for new results</a>	 	<input checked="" type="radio"/> Active <input type="radio"/> Inactive

# Search results.....

- Planning your literature review
- Translating the research question into a search strategy
- Identifying sources of information
- Maximising strategies for effective searching
- Staying up-to-date with your research topic
- **Managing your research results**

# Managing your search results

## Record your search strategy

- Save records and your search on the database
- Save records and searches to My Favourites in the Library catalogue
- Keep a record – paper, Word document, Excel spreadsheet

## Managing your search results

- Export from databases to EndNote or Zotero
- Organise your material in a matrix
- GradCoach: offer a free Excel spreadsheet template to organise your readings, keywords, authors, leads etc

# Resources - Document Delivery

If you find that perfect article and we don't have access to full text at Curtin:

- Request [document delivery](#) (we will obtain it from another library and email it to you)

# Resources - Borrowing from other libraries

- Current Curtin students and staff are entitled to borrow in person from the libraries of the University of Western Australia, Edith Cowan University, the University of Notre Dame, Murdoch University or TAFE libraries.
- You must [register online](#) first, and you will need to show your Curtin ID card and provide your Curtin email address when you first borrow items.
- Registration and borrowing are free of charge. Registration must be renewed each year.
- You may also arrange reciprocal borrowing from participating Interstate University Libraries in Australia and New Zealand.
